

What's New in JUMS 3.1.1

General

- Automatic Patch/Update functionality has been changed to a manual process to eliminate problems that have frequently occurred in the field.
- Locking messages have been expanded to explain which user has a lock on a table or record.
- DAI and DAI Supported unit functionality has been restored (Army only).

Ergonomic Enhancements

- **Date** fields now contain a calendar that allows you to click on a specific date to select a date. To select today's date, you must click the red circle at the bottom of the calendar. You may also type a date using digits, spaces, hyphens, periods, and/or slashes. When you **Save** the record, the date displays in the correct mm/dd/yyyy format. Left click on the year at the top of the calendar to display the up/down buttons for changing the year on the date selector.
- The following examples are all valid entries for Christmas day 2003:

12252003
12 25 2003
12-25-2003
12.25.2003
12/25/2003
12-25/2003

- **Cut**, **Copy** and **Paste** functionality has been included for most text data entry fields, and all **Date** data entry fields.
- Data in the currently selected data field is highlighted and displayed in bold. The user can toggle this display method **on** or **off** in the Edit Preferences section of the User Setup window.
- Where appropriate, check boxes have been added to list views for selecting multiple items for processing.
- **Enter** key or **Tab** key advances to the next data field.
- The cursor **Automatically Advances** to the next field when the maximum number of characters allowed for a particular data field has been entered. The user can toggle this display method **on** or **off** in the Edit Preferences section of the User Setup window.
- **Filtered Field Labels** are displayed in Bold, and Capitalized on the following windows: **Cadet**, **Clothing**, **Property**. This enhancement provides visual assistance to the user concerning the current filter setting

for the window. The user can toggle this display method **on** or **off** in the Edit Preferences section of the User Setup window.

Tips

Ergonomic enhancements are enabled/disabled in the Edit Preferences section of the User Setup window and are unique to the currently logged in User.

What's new in User Setup

Edit Preferences - The following preferences are now available in User Setup. The preference settings are unique to the currently logged in user and apply to all windows in the program.

- **Cadet Clothing Display** - Allows the user to select Issues and Returns, Issues Only, or Returns Only to display on the Clothing Cadet window and the Cadet Clothing history tab.
- **Auto Advance to Next Field** - Causes the cursor to automatically advance to the next data field when the user has entered the maximum number of characters allowed for a particular data field.
- **Auto Select Text** - When the user selects a data field, with the Tab key or a Mouse click, the entire contents of that field will automatically be selected. **Note:** Pressing any key with the contents of the field selected will cause the existing contents of the field to be replaced with the value of the pressed key. (This includes the Backspace key.)
- **Display Selected Text in Bold** - When the user selects a data field with the Tab key or a Mouse click, the entire contents of that field is automatically displayed in **Bold** font.
- **Enable Filter Warning** - Displays a warning when the user saves a record that the current filter setting may prevent the record from being displayed. The filter-warning message will not display if any of the following conditions are true: Enable Filter Warning has been turned off (set to **NO**), Enable Add Multiple Cadets has been turned on (set to **YES**), or when no filter has been set even if Enable Filter Warning is turned on (set to **YES**).
- **Enable Add Multiple Cadets** - Allows the user to add multiple cadets without returning to the Cadet window to select the **NEW** button for each cadet/midshipman added. When a new record is saved, a blank window is automatically displayed, ready for data entry. The user must select the **CLOSE** button to exit this process.
- **Filtered Field Labels are Displayed in Bold, and Capitalized** on the following windows: **Cadet, Clothing, Property**. This enhancement provides visual assistance to the user concerning the current filter setting.

What's new in Cadets

- Ability to **Import Data** from fixed field length text files has been added.
- Capability to **add multiple cadet** records. This function can be turned on or off in User Setup. Users can specify other ergonomic enhancements in the Edit Preferences section in User Setup.
- Capability to Batch Delete cadet/midshipman records.
- Added Batch Remove Returns (menu item) and individual Remove Returns (command button) to Clothing Cadet window.
- A warning has been added to the Batch Processing window to alert users that other users may be locked out of processes while batch processing is in progress.
- **Contact Info** field has been added to record contact information for a Cadet/Midshipman without having to click on the communication Edit button.
- **Medically Excused from Fitness Testing** flag has been added to aid in identifying Cadets in this category.
- List views have been provided with **check boxes for multiple selections** where appropriate. Cadet History tab check boxes only apply to deleting records. When the edit button is clicked the Edit window will display the highlighted record, not the checked record(s).
- (Army Only) Revised requirements for mandatory data entry fields to ensure Enrollment Reports contain correct information. Mandatory data entry fields:
 - **Last Name**
 - **Gender**
 - **Race**
 - **Status**
 - **Type**
- **Notes Tab** - Error encountered when entering lengthy notes has been corrected.
- **Notes Tab** - Added HQ standard topics for recommendations for Enlistment/ROTC (Army Only)
- **Events Tab** - Ability to **Hide** outdated events has been added. Cadet/Midshipman references to **hidden** events are maintained but the event is no longer visible in the Add Event window.
- **Events Tab** - Historical Award Credit is maintained when editing the event but the ability to edit the credits in the Event window has been removed.
- **Events Tab** - Functionality to remove Award Credits when an Event is deleted has been added.
- **Awards Tab** - Ability to **Adjust Credits** for an Award that has not been presented has been added.

- **Awards Tab** - Two reports have been added to display cumulative Award Credits and Award Credit history.

What's new in Clothing

- Clothing items are displayed according to the **Order** selected on the **File** menu (i.e., by **NIIN/NSN** or **Description**) on all Clothing windows except Gain Loss. Gain Loss displays available items by **Description** only.
- **Shelf Quantity Management** has been added to the **File** menu. This function allows the user to:
 1. Delete all current shelf line items that have a quantity of zero (0) and are not referenced by any location (issued, returned, etc.) anywhere else in the system. This process will remove one (1) line item from the shelf for each clothing item deleted and may significantly **increase** your program processing speed.
 2. Add all orderable items to the shelf that are currently not on the shelf. Added items will have a shelf quantity of zero (0). This process will add a large number of line items to the shelf and may significantly **decrease** your program processing speed.
- When creating a **Clothing Order** with the **Order** set to display by **NIIN/NSN**, the **Size** list box is not available in the Order window. The size is embedded in the NIIN/NSN.
- A **Preview** button has been added to the **Order** window toolbar that allows the user to review an order before Submitting.
- **Clothing Price Update** preserves existing order information when possible.
- On the **Post** window, the **User NIIN/NSN** field is utilized to post receipt of user-defined NIIN/NSNs and/or items received from a transfer. The list box contains all Shelf line items as well as all orderable items.
- An item posted via the **User NIIN/NSN** field is added to the **Shelf Quantity** but the **On Order Quantity** is not reduced. The item is not automatically posted to the Fast Data System for NROTC Units.
- A user-defined **NIIN/NSN** can be posted to the Shelf without entering a **Quantity Received**. The item will be added to the **Shelf** with a **Quantity** of zero (0).
- On the **Post** window, the **Order NIIN/NSN** field is utilized to post receipt of items received from an Order.
- The default **Clothing Cadet/Midshipman Display (Issues and Returns, Issues Only, or Returns Only)** is set in the User Setup window. The user may change the display on the **Clothing Cadet/Midshipman** window by selecting the desired display from the **Display** list box.

- The **Purge Surveyed Items** message that displays after printing the Survey report now recommends that the user leave the Surveyed items in the system until the survey paperwork has been completely processed.

What's new in Property

- The **Purge Surveyed Items** message that displays after printing the Survey report now recommends that the user leave the Surveyed items in the system until the survey paperwork has been completely processed.

What's new in Reports

- **User Flag** security settings have been applied to Ad Hoc reports.
- Error in printing correct cadet family information on **Cadet Record** has been corrected.
- **Batch History** - Multiple zeros have been prefixed on report numbers to facilitate sorting.
- **Batch History** - An **Optional Remarks** field has been added to more clearly define the type of batch process.
- **Line Count (# of records)** on Canned and Ad Hoc reports has been added.
- **Award Summary** report error has been corrected.
- In order to edit a **New Enrollment report** all Active cadets must have a **Gender**, **Race**, and **Science course** assigned (**NS** - Navy, **LET** - Army).
- **Award/Promotion/Demotion Orders** - Ability to filter display based on **Class and/or Period** has been included.
- **Award/Promotion/Demotion Orders** - Multiple zeros have been prefixed to Auto Order numbers to facilitate sorting.
- **Award/Promotion/Demotion Orders** - Help has been expanded.
- Sizes have been added to all **Clothing** reports and displays where applicable.
- **Ad Hoc** - Ability to **Import/Export** custom reports from/to units has been added.
- **Ad Hoc** - **Full Name** field has been added to Cadet Personal Information.
- **Ad Hoc** - **Tag** field has been added to Clothing and Instructional Materials reports.
- **Ad Hoc** - Sorting error on Fitness reports has been corrected (Army only).
- **Unit Report** has been added (Army only).
- **IMPAC** (GPC) Report has been added (Army only).
